AroCode

Refund Policy

This Refund Policy describes the general terms for requesting refunds for products or services purchased from AroCode. Please review the applicable product or service terms before submitting a request.

Eligibility

- Refund requests should be submitted within 30 calendar days of delivery or service completion, unless a product-specific policy states otherwise.
- Items must be returned with all included accessories and original packaging where reasonably available.
- Damaged, defective, incorrect, or materially misdescribed items may qualify for review even when standard return conditions are not met.
- Digital services, customized items, and special-order products may be non-refundable when this was disclosed before purchase and applicable law permits it.

How to Request a Refund

- Contact AroCode customer support and provide the order ID, purchase details, and a clear reason for the request.
- For damaged or defective items, provide photos, videos, or other reasonable evidence if requested.
- AroCode will review the request and communicate the decision or ask for any missing information.
- Approved refunds are normally initiated within 5–10 business days. The time for funds to appear depends on the payment provider or bank.
- Refunds are generally sent to the original payment method unless another method is agreed and permitted.

Exceptions and Important Notes

- Shipping, installation, or service fees may be non-refundable if the service was completed and the fee was disclosed before purchase, subject to applicable law.
- Items showing damage caused by misuse, unauthorized modification, or accidental damage may be ineligible for a refund.
- Promotional purchases may have special return conditions disclosed at checkout.
- Submitting a request does not guarantee approval; each request is assessed against the applicable policy and evidence.
