AroCode

Warranty Policy

This Warranty Policy template explains how warranty coverage may apply to eligible AroCode products or services. The exact coverage is determined by the warranty terms provided at purchase.

Standard Warranty

- Warranty coverage, duration, and remedies depend on the product or service purchased and the terms shown on the invoice or warranty certificate.
- Where a warranty period is specified, it begins on the delivery date or the date stated in the purchase documentation.
- Keep the invoice, order ID, and warranty certificate as proof of purchase.

What May Be Covered

- Manufacturing defects or faults arising under normal, intended use during the applicable warranty period.
- A component failure confirmed by AroCode or an authorized service provider to be covered by the relevant warranty terms.
- Repair, replacement, or another remedy as specified in the applicable product warranty and permitted by law.

What May Not Be Covered

- Damage caused by accidents, misuse, neglect, liquid exposure, power issues, or use outside product instructions.
- Damage resulting from unauthorized repair, alteration, or installation where that action caused the fault.
- Normal wear and tear, consumables, or cosmetic damage that does not affect functionality, unless stated otherwise.
- Issues arising after the applicable warranty period has expired.

How to Make a Warranty Claim

- Contact AroCode support with your order ID, proof of purchase, product details, and a description of the issue.
- Provide photos, videos, or diagnostic information when reasonably requested.
- AroCode will explain the next steps, which may include troubleshooting, inspection, repair, or replacement.
- Do not send a product for repair or return until support provides the applicable instructions.
